velop from the soil as large nuncial products as possible; in di-do this the farmer abould aim to preserve and increase the fertility of the soil, to culing three o tivate it thoroughly by the most approved pint of water. methods, and with the most improved machinery. In order to economice labor and swallowed will be expense he must make a judicious selecthrown from the stomac tion of the best seeds and select the finest drinking half a glass of water breeds of animals. Now, in order to make (warm is best), in which has these selections, thanks to the enlightened age in which we live, it is not necessary for been stirred a tablespoonful of ground mustard; as soon as the farmer to spend a life-time in experi menting for himself, but he can profit from vomiting ceases, drink a cup of the teil and labor of other hands and othstrong coffee, into which has er brains than his; and it appears to me been stirred the white of an egg. This nullfies any remnant which the mustard might have that in order to profit by the experience of others in the least possible time farmers should organize fairs or exhibitions and left. appoint certain days in the year when they should meet together and bring with the dry place in the cellar and not the best fraits of their labor, whether it be be used until three months old. the productions of the soil the best improved specimens of their stock, or the and other odors by dissolving a teaspoonful of pearlash or there be an honest potriotic rivalry to excel, not only in that which is useful and profitasaleratus in water and washing not only in that which is useful and prolita-ble, but also that which is beautiful and pleasing to the eye. This is the course pursued by the wealthy counties in the north-west, where farming and stock raising has attained the highest point of perfection in this country, and we may should be kept in a cool, dry well follow their example. It has been lemonstrated there beyond a question that in order to make farming a paying business, a very large percentage of the products of the soil must be fed and consumen on the farm, and that that course is only profitable when fed to improve stock. They give two sound reasons for this theored ants will disappear." ry; one is that in feeding your grain on the farm you retain all the decayed vegetation, which with Judicious care, can be made cannot be killed in the stornach valuable as a fertilizer and returned to the of a horse, The best thing to soil. And again, they save a very large percentage in freights it being much cheapdo to prevent their getting there is to trim off all the long hairs er to ship for cattle and hops than corn. from the shoulder foreleg, jaws County fairs afford the farmer not only and breast, on which the botfly an opportunity to examine and compare the deposits her eggs, and smear the parts with oil, to prevent

best stock, seeds and machinery, but to compare thoughts and ideas with his neighbors in regard to attaining a more thorough knowledge and practice of agri-culture as a science; by this I mean a knowledge of the principles. The whys and wherefores which lie at the foundation of successful farming and of the practical application of those principles com bine skill and economy; and, in order t obtain the many advantages offorded by a county fair every possible inducement should be offered to encourage the importation and breeding of improved breeds of stock There is no interest of the farmer in this county more radly neglected than that of improving the farm horses and dairy cows. We should learn that it costs us much to feed an inferior animal as a good one, and the profits are five times less It has been concin shown by the census that the leaves. It has imparted to it labor of a single man in Massachuetts, is equal in profit to the labor of five men in a most agreeable, ordor, and ath. Those men believe in skilled ladoes not readily turn sour. A bur, believe that knowledge is power with the farmer as well as the professions. fresh sprig shold be used each time.

aral exhibitions; they tend to clevate labor, to cause increased respect for farmers, and teaches there to magnify their employment, to more thoroughly un derstand that all improvement all progress of the race in civilization has been the result of intelligent labor; that we belong to a class of chizens who hold in our hands five-sixths of the wealth of the coun try and its political power; and if the ciples of our noble order are fully carried out, the hands and brains that wrought this great wealth will be able to protect and defend all the rights justly belonging to them. In conclusion, I would say from my own observation, I believe that no fair or exhibition can be made a success utiless we can obtain the hearty co-operation of the ladies; much will depend upon their skill and presence, in fact I think a fair would be no fair at all, without the presence of our fair ladies,

A PREVENTIVE AGAINST THE "Skipper" in Bacon. This maggot is hatched from an egg, deposited by the fly, early in the season, upon the flesh side of the joints of bacon, and rarely ASHLEY, WASHINGTON CO., Rat., Jan. 14.
1878.
ME. H. R. STEKENS:—
Dear ST. —This is to certify that I had been sudding from a Base Cancer on my right breast, which grey very randily, and all my House had been to be the commended for Camer and Cancerons Humorous. I commenced to take H, and seen found myselfaction to take H, and seen found myselfacted, and in a fayr months from the lime tending the best feel begins induced which it exertify and in a fayr months from the lime tenumenced, the use of tan Vegetline, the cancer came out almost bedly.

I certify that I am personally acquainted with Mrs. Beforest, and consider her one of our commenced with Mrs. Beforest, and consider her age of our very best women. DR. S. H. HOW Life.

All Decisies of the Boon.—If Vereline upon the sides. We have found the following receipt to be a never failing preventive. Take ground black pepper, and mix with molasses, to the consistency of a thick paste, and thorghly rub over the flesh side of the joint and the hock. From one to two tablespoonfuls will be sufficient. It is best to get the unground pepper and grind to a fine powder at home, as the packages of pepper usually found at the grocery are adul-terated in their manufacture. The application should be made early in the spring before the fly appears; but if delayed until the egg has been deposited or hatched, then scrape, the joints thoroughly, and expose to the sun till clean, after which apply the pepper, and there will be no further trouble. It is not abso-Mn. H. B. Syrvings.—

Dear Sir.—I take pleasure in saving, that I may need the Vegetine in my family with good results, and I hause known of several case of semarkanic cure effected by it. I regard it as a visible family medicine.

This years,

REV, WM. McDonald Is well known through the United States as a minister of the W. E. Charch. lutely necessary to mix with molasses as the pepper may be as well applied after washing or wetting the surface, so as to cause the pepper to adhere. It may be then applied liberally from an ordidary pepper-box.

To every man there are many many dark hours, when he feels inclined to abandon his best enterprise-when his heart's dearest hopes appear delusive-hours when he feels unequeal to the burden, when all his aspirations seem worthless. Let no one think he alone has dark hours. They are the common lot of humanity. They are the touchstone to try whether we are current coin or not.
